Turn-Key is a full service environmental management company that has been servicing our industry since 1996. We have predicated our services on fast response, customer care, and finding unique and innovative solutions to each customer's situation. This is achieved through an extremely high level of customer service. Our job is to make your job easier.

Turn-Key Mission Statement:

Provide the highest degree of customer service possible.

Minimize client cost and liability associated with disposal activities.

Utilize the best environmental technology available.

FIELD SERVICES

Lab Packs

Turn-Key provides professional management and safe disposal of laboratory reagent grade, unused or outdated chemicals often found in research labs, universities, schools and manufacturing operations. Turn-Key offers skilled professionals trained specifically to deal with these potentially dangerous materials. Our specialists collect, identify, categorize, and package your waste into DOT approved containers for disposal.

Chemical Stabilization

Occasionally reactive chemicals need to be stabilized prior to packaging and transportation. Turn-Key utilizes documented chemical stabilization techniques and chemistry-based procedures for the following types of compounds:

- Peroxide Forming Compounds
- Temperature Sensitive Compounds
- Organic Peroxides
- Shock Sensitive Compounds
- Multi-nitrated Compounds
- Azides

Turn-Key owns & maintains its own state-of-the-art personal protective gear to safely stabilize chemicals.

Unknown Characterization

Occasionally customers find jars and bottles containing unknown waste material. These materials need to be properly identified prior to packaging. Highly trained Turn-Key Chemists utilize wet chemistry techniques to characterize these materials for disposal. These materials are then segregated and packaged according to chemical compatibility and characteristics to insure safe storage, transportation and disposal.

Specialty Services

Facility Closures and Cleanouts... Turn-Key provides experienced Project Managers and Chemists to perform comprehensive, site-specific chemical removal and disposal for facilities experiencing a closure or a major clean out.

On-Site Program Management... For customers requiring assistance in managing chemical inventories and waste storage areas, Turn-Key provides on-site program managers with expertise tailored to the client's specific needs.

Lab Moves... Customers planning to move their chemicals from one location to another can rely on Turn-Key Chemists to safely categorize, package, and transport the chemicals to the new location.

Tank Management... Turn-Key provides proper management of both aboveground storage tanks (AST) and underground storage tanks (UST). These services include closure of registered and unregistered tanks, UST removals, AST demolition, tank cleanings, and tank inspections.

Industrial Maintenance... Turn-Key offers high pressure cleaning, vacuuming of dusts and solids, and removal of sludges/solids associated with oil/water separators, process lines, process equipment, contaminated surfaces, sumps, pits and trenches.

Remediation services... Turn-Key provides excavation and transportation of contaminated soils, site restorations, facility dismantling and closures, and dewatering of sludges.

HAZARDOUS & NON-HAZARDOUS WASTE MANAGEMENT

Drummed & Bulk Waste

Turn-Key's staff has many years of experience in managing hazardous & non-hazardous waste. We maintain strong relationships with TSDFs nationwide to handle these wastes. Our objective is to provide you with the most sound and cost-effective waste disposal program. Turn-

Key's staff will also assist you in maintaining regulatory compliance at your location. Proper management and storage of waste will eliminate costly and time consuming regulatory issues.

HAZARDOUS DISPOSAL OPTIONS INCLUDE:

- Recycling
- Solvent Recovery
- Physio-Chemical Treatment
- Incineration
- Stabilization/Landfill
- Waste Water Treatment

NON-HAZARDOUS DISPOSAL OPTIONS INCLUDE:

- Cement Kiln Incineration Options
- Waste to Energy Incineration
- Consumer Products Defacing/Destruction/ Shredding
- Oil & Water Separation and Wastewater Treatment
- Solidification of Liquids & Sludges

Labeling & Manifesting

Upon completion of packing and labeling of all containers, the Turn-Key team will complete the necessary manifests and associated documentation, including land disposal restriction notifications.

All documentation is presented to the generator for review and authorization prior to transportation of the waste.

BENEFICIAL REUSE OPTIONS AND RECYCLING SERVICES

Turn-Key actively pursues beneficial re-use and recycling options. Many waste streams currently being processed at treatment facilities such as solvents, acids, caustics, oils, plastics and non-hazardous materials can be re-used by other companies or processed at a recycling facility. The major benefits of these services are waste minimization and the elimination or reduction in transportation and disposal costs while utilizing environmental friendly solutions.

BENEFICIAL REUSE OPTIONS & RECYCLING SERVICES:

- Off-site Solvent Distillation & Return
- Oil Recycling
- Alternative Fuels
- Rag Laundering Service
- Universal Waste Recycling
- Raw Material Replacement

TRANSPORTATION SERVICES

Transportation plays an important role in the proper management of your waste materials. Turn-Key will coordinate the pick-up and delivery of waste materials from the generation location to the ultimate treatment destination. We will determine the most appropriate and cost effective transportation equipment to meet your waste disposal needs. From less-than-truck load (LTL) to bulk waste shipments, Turn-Key provides a variety of permitted vehicles and vessels.

- Owned & Operated Straight Trucks with Lift Gate
- Standard Tankers
- Box Vans (Lift Gate optional)
- High Induction Vacuum Tankers
- Roll-Off Containers
- Sludge Boxes
- Vacuum Tankers
- Dump Trailers

Turn-Key is "A-901 Permitted" to transport and manage waste in the State of New Jersey.
